HICKS NURSERIES WESTBURY LONG ISLAND N. Y.

in mater

HE names of the Trees and Shrubs in this catalogue are based on the recommendations of the American Joint Committee on Horticultural Nomenclature as they appear in Bailey's Standard Cyclopedia of Horticulture, pages 3575 to 3591.

GUARANTEE-No Risk to You

We guarantee every plant from our nursery, and give new ones for those that do not grow satisfactorily. The cost of planting and transportation of replaced trees is borne by the purchaser.

PLANTING AND CARE

This guarantee holds even if your men plant. It is better that they prepare the ground (send for sizes of holes), plant, mulch, or cultivate and water. Summer watering is the most important. You can keep the plants a week or two by firmly covering the roots with moist earth immediately after delivery.

PRICES, DELIVERY, PACKING

The prices in this list are for trees and plants dug and loaded at our nurseries. We charge for delivery, or packing in boxes, bales, or crates for shipment. On request we shall be pleased to estimate the cost of the above, and the cost of freight or express. Five plants are sold at the 10 rate and 50 at the 100 rate.

CORNUS florida. White Flowering Dogwood.

This stock of Dogwood, both the white and red flowering, gives you an opportunity to let this "most showy of the native trees" make good its reputation. The trees could not have better roots for they have been transplanted recently. They are ready to make sheets of white through your landscape, that is so delightful in the native growth. While you are weaving these in, you won't forget Cornus Kousa, and Cornus officinalis. They are the invincible trio of the genus. Also see Cornus under shrubs.

Here are 20,000 little trees that are going to make someone's landscape resound with beauty. When you eonsider how easy it is to scatter a thousand such trees in the edges of woodland, through the cedar fields or in the hedge rows, one can appreciate that this stock will not last long. Sheets of white in June—glorious repetition of the beauty of the native species.

DOGWOOD. See Cornus.

ELM. See Ulmus.

FAGUS americana. American Beech.

No tree is admired more and planted less. It's almost an opportunity of a lifetime to have such trees as we offer available. Nature has developed handsome, dense tops. We have developed a fine system of concentrated roots, and that answers every objection that could ever be raised against Beech. Now you can have this tree of trees—the smooth glistening bark; the pretty horizontal light and shadow; the graceful spray; the rich golden Fall coloring; the russet foliage adhering all Winter—with as little risk of disappointment as if you were planting a Norway Maple.

Height	Quantity	Each	Per 10

"The hole tells the story" said a landscape architect, of our Beech-The hole does tell part of the story. The big ball and the thousand little roots tell the rest

Beech.—The trees we offer will make a dense hedge like this at once, 14 or more feet high, if you wish. Does such choice landscape material interest you? Not only rare in size and quality but rare in beauty. You will want your landscape to have a touch of it.

GINKGO biloba. Maiden Hair Tree.

There may be a place where you will want to use a tree that is good for a thousand years. For any memorial purpose this naturally shares honor with the Oak.

KŒLREUTERIA paniculata. Golden Wreath or Varnish Tree.

Usually, shrubbery plantings lose their interest the end of June. Not so when Golden Wreath is woven in. This large shrub or small tree is a very acceptable relay, opening its large panicles of lemon colored flowers in July. If you are after a land-scape that will smile in midsummer you will be glad to know of this stock.

Magnolia.—A few of our larger specimens. They are filled with buds and will make a glorious show the first year. It is not always possible to get such a wealth of beauty without waiting several years.

LARIX europæa. European Larch. Quantit 6-8 ft. high		Per 100
LINDEN. See Tilia.		
LIQUIDAMBAR Styraciflua. Sweet	Gum.	
Aiming to have a brilliant Autumn		

Aming to have a brilliant Autumn landscape? Sweet Gum is one of the very brilliant trees in this section. The larger trees we dig with a ball so they are sure to thrive. In speaking of bright Autumn foliage, Oaks are also sure to make good. See Quercus. Height Diam. Spread

LIRIODENDRON Tulipifera. Tulip Tree.

Don't you think American trees should have a larger representation in our landscapes? Not so much for sentimental reasons but for their merits. Think them over, Beech, Oak, Elm, etc. And here is one of the most stately of them all. Tulip trees in a landscape show the work of a master. The old objection of being difficult to transplant does not hold with the trees we offer for we have made it our business to develop root-systems that will make your investment in Tulip trees safe. We guarantee this. Height Diam. Spread

8 ft. high, deep pink....

PRUNUS var. sachalinensis (Sargentii)

Those acquainted with and hungry for rare trees ask for this and pay almost any price to get it. The profusion of rose, pink and nearly white flowers as well as the brilliant Autumn foliage would seem good and sufficient reasons for its popularity.

Quantity Each Per 10

100 \$1.25 \$10.00 2-3 ft. high.....

P. subhirtella pendula. Japanese Weeping Cherry. 50 4-7 ft. high.....

QUERCUS alba. White Oak.

Whenever you have seen a venerable old White Oak no doubt you have devoutly wished to be able to use it in your plantings. We are able to offer you now White Oaks in quantity; in respectable sizes; and what is infinitely more important, with roots that will make the trees a success. Possibly you do not need to be told about the value of root pruning and transplanting. With such trees as Oak and Beech it is the principal value and represents most of the cost. The trees have real Oak character right now, stocky trunk, and stout branches. The larger sizes are dug with a heavy ball of soil. IDEAL FOR MEMORIAL PURPOSES.

Near the house is a graceful Silver Maple, planted from the Hicks Nurseries. On the left is a Pin Oak. You can order such trees by mail. Satisfactory growth guaranteed.

QUERCUS coccinea. Scarlet Oak.

How peculiar trees are. The most desirable species almost without exception are the most difficult to grow properly and transplant. Scarlet Oak has been sending out coarse roots in dry soil over a large radius to get sufficient moisture, so many centuries, it has become a habit. The problem of the grower has been to break this habit, and there are much easier things to do in this world than break habits. Here are trees which have been reformed. Fine roots. We guarantee success.

Pin Oaks.—They certainly make a dignified landscape and to think that you can get them in all sizes up to 50 years old and guaranteed -seems almost too good to be true. See page 10.

QUERCUS palustris. Pin Oak.

You would not ask for and could not get finer trees. the quantities too. Plenty to carry out your plans, whether they call for one handsome specimen, or several trees for a shady grove; a couple of evenly matched trees for an entrance, or a hundred a couple of evenly matched trees for an entrance, or a hundred trees for a plaza or other formal planting. The high quality starts with the small trees and continues right through to the largest tree. And when we talk of quality we don't want you to picture in your imagination a lot of perfectly straight trees, with symmetrical head and branches. Oh yes, the trees are straight, just as straight as if grown by a plumb line. And they are symmetrical too, for they have had four times as much space to grow in as is usually given. The sunshine all around has developed robust branches on all sides. The trees are straight and they are symmetrical but the important part is the good roots. They symmetrical but the important part is the good roots. have been transplanted several times and moved wider and wider apart which has produced ideal root systems. Make good roots the first qualification in buying trees. Better buy crooked trees with good roots than trees with perfect tops and poor roots. Our Pin Oaks are the best, top and bottom, and with such trees available you do yourself an injustice to think of any other kind.

WILLOW					

Lindens planted around an entrance court. We refer you especially to our Silver Linden 16-20 ft. high. These make a large showing at once without calling for a large investment. The insert shows a Linden and Pin Oak. We move them this way in full leaf all Summer and they don't even wilt. It does seem incredible but no more so than any other breaking away from tradition.

Pinus Strobus. White Pine.—They make a wall of green around your lawn or garden, and give you all the pleasures of the country on a small area. Nothing attractive about a busy street, or your neighbors' buildings. Walls of brick and stone surround many European gardens to give quiet, outdoor rooms for all the family. Walls of green are more beautiful, more serviceable and more in accord with American ideals. We have been working for many years to grow walls of green and perfect the methods for safely and economically establishing them on your grounds.

EVERGREENS

ALL YEAR BEAUTY, SCREENS, HEDGES, WINDBREAKS, SEASIDE AND FOREST PLANTING

Evergreens are a specialty with us. We have never aimed to have the largest number of varieties—we have rather aimed against a long list. We have interested ourselves in species which have proven their fitness to our climate. Those that could not endure either the heat of the Summer or the cold of the Winter, have been discarded. The scrap heap of this Nursery saves you from having a scrap heap of your own and spares you the humiliation of a marred landscape, cost of experiment, and aggravation from loss of time.

Having established the fitness of the species we made it our business to grow them well. We will not go into tireless or technical details here. They will be referred to in the following pages. You can assure yourself of two things then in respect to the evergreens we offer.

First. They are the best species. Second. They are superior grown.

The only other thing which will interest you is our guarantee of satisfaction and you have that too. You will discover in the list, some species which rather belie our statement of fitness. These have been included merely to meet a popular demand. Their limitations are clearly stated, and the very restricted quantity we think will testify to our lack of enthusiasm for them.

ABIES concolor. White Fir.

F-I-R spells tap roots. H-I-C-K-S spells tapless roots. The tap root is all we have ever heard against this rugged Fir from the Rockies and we have removed the cause for that criticism. You can now weave the handsome gray-green foliage in your landscape with absolute assurance of success.

ABIES lasiocarpa. Subalpine Fir.

Dense and slow growing. It is to the fir group about what the Swiss Stone Pine is to the Pines.

	Quantity	Each	Per 10	Per 100
3 ft. high	30	\$6.00	\$50.00	
4 ft. high		10.00	90.00	
10 ft. high	10	65.00	600.00	

A. Nordmanniana. Nordmann's Fir.

Rich as old dwarf Boxwood. Glossy, dark green foliage. Some landscape architects use these broad, flat top specimens where they wish low, rounded masses of rich foliage. To make a background for hollyhocks and Delphinium, nothing could be richer than a closely woven mass of these big Firs with a carpet of Kalmia, Pachysandra and a bit of Holly.

acity sandra and a bit of Hony.

**			

A. Veitchii. Veitch's Fir.

Light green with a silvery sheen on the under side of foliage. A good tree to mix in with other pointed top evergreens.

5 ft. high..... 8.00 75.00 \$700.00 300 6 ft. high..... 12.00 - 110.0040

ARBOR VITÆ. See Thuja.

CEDAR. See Juniperus.

What is more lovely than a group of Firs? You will say a group of Firs with Rhododendrons or Laurel at their base, and a background of Pines. Holly and bulbs would make the creation more glorious.

Chamæcyparis var. gracilis nana.

Juniper.—Low growing or trailing evergreens give a touch of color to the rock garden in Winter and look so much at home.

CHAMÆCYPARIS obtusa. Obtused-leaved Retinispora.

The Retinisporas or Japanese Cypress, as a class no doubt have been worked overtime. The variation in color appeal to the lay planter and the trees sell in spite of opposed conviction, and luke-warm descriptions. The dark green varieties especially of the obtusa species, as a rule harmonize and on account of their rich color make a pleasing detail in the landscape. This species when used to give height in beds of dwarf evergreens does not seem to elicit criticism.

It is attractive because of its flowing lines. Nothing is harsh or abrupt. The tall Colorado Blue Spruce and Cedar are gracefully mellowed by the tapering masses of Magnolia, Boxwood, and White Day Lily. We shall be glad to show you plants that will add beauty to your evergreen compositions.

For the worst shore exposure Pines are most reliable, and the most reliable Pines are Austrian, Japanese Black, Scotch, and Pitch. Your conditions may be such that many other evergreens can be added, or even deciduous trees and shrubs, as Wild Cherry, Privet, Balsam Poplar, Red Maple, Wild Roses, Bayberry, Sumach, and Oaks.

PINUS Banksiana (divaricata). Jack Pine.

Evergreens might be divided into two classes as far as color is concerned, the dark, rich, velvety greens; and the light yellowish greens (not golden, Oh, no!). In Summer when there is plenty of deciduous foliage, grass, and flowers to give relief, the dark, rich texture of the Yew, Oriental Spruce, Nordmann Fir, Boxwood, etc. must be admired. In Winter, and intensified by snow, dark foliage rather assumes a sombre aspeet, appearing often as a black mass. How acceptable then, are trees that really smile. Not trees of contra-natural color, but those trees in which the chlorophyll shows just enough yellow to make the trees look blythe and full of life. Jack Pine is one of these species.

2 ft. wide	200	5.00	45.00	400.00

P. nigra austriaca. Austrian Pine.

Austrian Pine needs frequent transplanting and moving with large ball of earth. We have done this. There isn't a tree in the nursery of the usual left-over kind, planted 1 foot high, and allowed to grow until it is 7 feet high. It eosts several dollars a tree to move them. Now they are ready, having been moved one, two and three years ago. They could not be better for your purpose. City smoke, salt spray, cold wind or driving rains—Austrian Pine looks the same. Everybody likes them.

10 ft. high, 6-8 ft. spr	20	60.00	550.00	

P. parviflora. Japanese Short Leaved Pine.

White Pines.—These trees are turned out as a factory product. All uniform, highest quality, big substantial balls, couldn't-bebetter roots. No risk, no disappointment. Its a real pleasure to create out a landscape with trees like these.

PINUS STROBUS. WHITE PINE

The Pine of All Pines

Quality Supreme

Cardinal Trees for Most Landscapes

Your selection can have the widest range. All sizes. The little fellows make themselves at home and quickly forest a barren piece of land. Larger ones are just the trees for extensive landscape plantings. Still larger ones will immediately break the wind for the children or flowers, and make an effective screen to any disturbing element in the landscape. The big fellows are broad, full, mature specimens that will take the rawness away from any new landscape.

All root pruned and transplanted one to several times according to size. It has cost twice as much to grow them right but they are worth three times as much. No disappointment to anybody. You know better than we how much absolute satisfaction is worth to you.

PSEUDOTSUGA (Picea) Douglasii. Douglas Spruce.

This is one of our favorites but that is no reason why it need be a favorite with others. Freedom from insects and absolute hardiness after a 30-year test is a worthy record, so you can take this species on its record. It is native on the slopes of the Colorado Mountains. To start a good hedge or grove try some of them at o feet high. If you want a few to make a tall narrow wall of green try those 9 feet high. Remember these and all our evergreens are guaranteed to grow satisfactorily, or replaced free. We wouldn't guarantee them if we didn't know they were good.

SPRUCE. See Picea.

Here is a corner in an evergreen garden. With the heavy background of Pines you can almost feel the stillness. There is recreation for both mind and body in a restful retreat like this. It can be reproduced immediately by material at Hicks Nurseries.

HEMLOCK HEDGE AT HICKS NURSERIES.—Here is, an evergreen hedge that is over forty years old—a solid wall, 600 feet long, 12 feet high, and 10 feet wide. You can fairly appreciate the size by standing up a pole, 12 feet long, with a 10-foot crosspiece. These will aid you in realizing what absolute seclusion this hedge will give around a garden, or how completely it will screen a service drive, or what dignity it will give a formal approach to the most stately residence. To appreciate fully the elegance of this hedge, we are frank to say, it should be seen. There is the quality of age in its texture, and a beauty which can come only with age. We might compare it with the old Yew hedges in English gardens. Walls can give equal seclusion, but can never have the beauty and refinement, not even when time and the elements have added their handiwork. Tell us where the trees are to go and we will give a price delivered, planted and guaranteed or packed f. o. b., Westbury.

Taxus.—We have thousands of them that will make low masses of rich green. You couldn't have better material for weaving into a handsome tapestry, at the house foundation or wherever a low planting is wanted.

Taxus cuspidata.—Japanese Yew. Want a Yew hedge?

Shrubs used as a garden enclosure. High enough to give the necessary seclusion and cheerful enough to fit into a garden atmosphere.

FLOWERING OR DECIDUOUS SHRUBS

No use talking, for doing a job quick and doing it well and doing it economically shrubs have a peculiar adaptation Those that linger sweet in the memory are here. Beautiful rare ones are also here. Those for dry ground are here and those for shady positions. The attractive fruiting or berry-bearing shrubs are here. Most of the native species are likewise available in quantity. All of them are guaranteed to grow satisfactorily or replaced free.

Hydrangea quercifolia. It keeps low.

Pavia.—There comes a time between Spring-flowering shrubs and the late Summer shrubs, when there are no flowers in most shrub collections. This period is bridged by the Dwarf Horse-Chestnut, Hydrangea quercifolia. The Dwarf Horse-Chestnut is a broad shrub about 7 feet high, with slender spikes of graceful flowers, 1 foot long.

LONICERA fragrantissima. Fragrant Bush Honeysuckle. Near the seashore this makes a great dome of healthy foliage almost as green as a Holly until Christmas. In the Winter of 1912-13 this and Japanese Pussy Willow, Salix multinervis; Jasmine nudiflora and Hamamelis Japonica bloomed here all Winter. We will be glad to submit estimates on your lists for Winter Quantity Each 600 \$0.75 Per 10 Per 100 2-3 ft. high.... \$5.00 \$40.00 L. Morrowii. Japanese Bush Honeysuckle. Extensively used in large shrub plantations because of its widespreading habit, keeping full at the base. It has cream-colored flowers in June. Berries bright red, bornc profusely in long clusters, ripening in Summer. Our plants are extra good. 2 ft. high..... 175 .35 3.00×25.00 3 ft. high..... 4.50 40.00 4 ft. high... 20 L. tatarica. Tartarian Bush Honeysuckle. One of the first shrubs to leaf out in Spring, coming with the Larch. It grows 8 ft. high, qualifying for the taller portions of your shrubbery. Flowers cream or pink. Bright red berries in July, which are entirely at the mercy of the robins. .35 3.00 25.004.5040.00 .50 6.0050.00 MYRICA cerifera. Bayberry Wax Myrtle. It is a pleasure to see them take hold in dry soil and make a handsome dense dome. 6-12 in. high.... OPULASTER opulifolius (Physocarpus). Ninebark Spiraea. 6-8 ft. high..... 80

SUMAC. See Rhus.

Styrax.—One of the rare flowering trees. If you contemplate a boundary of small-growing trees, attractive compositions can be made with Styrax, Dogwood, Birch, Magnolia, Hornbeam, Yellow-wood. Taller trees, such as Pin Oak, Beech, Liquidambar, Larch, Linden and Maple can be used to give a higher sky-line and longer shadows across the lawn.

Syringa. Lilac.—Who wouldn't like to bury their nose in one of those panicles? Why not provide for collection of Lilacs? The varieties we offer are among the best in the famous collection at Highland Park, Rochester. The detail flower is Marie Legraye.

Are you a friend of the birds? They require food and shelter. We grow many berry-bearing trees and shrubs which provide food, and our evergreens will give just the Winter shelter and nesting-sites they need. See our offerings on Viburnum, Cornus, Sumach, Barberry, Photinia, Elder, Black Alder, Holly, Bayberry, Spice Bush, Snowberry, Elæagnus, Magnolia, Bush Honeysuckle, Virginia Creeper, Hall's Honeysuckle, Juniper. We can make up a collection at \$10 per 100, of different berry-bearing plants in small sizes. Plant in tangled thickets and in large quantities.

TREES AND PLANTS FOR FORMAL GARDENS

Ligustrum Ibota Pyramids. The eye is always attracted to plants that show buman handiwork and skill. These give as mature and substantial results as the plants in old formal gardens that have been trained for many years. They are on a scale proportionate to large houses and grounds, while many imported plants are too narrow to look substantial.

EVERGREEN SHRUBS

This class of plants is particularly happy on our sandy, lime-free soil. The roots take hold and make big balls of roots that will readily unite with the soil of their new situation. This is not the case with freshly imported plants which have a little ball of compressed peat, which dries and shrinks away from the adjoining soil and does not readily take up soil moisture. We prepare our ground by plowing in 6 inches of forest leaves. It produces just the acid, aerated, moist conditions these plants like. Our plants are fully exposed to the sun. This makes numerous flower buds and compact growth.

Rhododendrons-A Word About Color

The varieties are listed according to color so that they may be selected for harmonious arrangement. The crimsons, light reds or pinks may be planted with the pinkish whites or pure whites. Groups of the amaranth shades of red or dark crimson may be lightened by the free use of white. The pinkish lilac and mauve shades planted with the lilac white and pure white varieties make charmingly dainty combinations. The purple and magenta shades, combined with white, are effective in positions isolated from the other colors or in the woodland.

We would be glad to show you a series of Lumière Autochrome plates, showing combinations of the various varieties.

What to plant in the woods is a frequent question. Rhododendrons are often the best answer. The decaying leaves are there. The shade and wind protection are just right. Rhododendrons blend harmoniously with the Dogwood, Arrowwood, Oak and Hickory. In the Winter Rhododendrons enliven the scene which is otherwise monotonous. As the plants grow and commence to touch you can have the pleasure of extending the group, carrying the eye further back into the deeper shadows.

VINES

The uses of Vines in the landscape are as varied as of any other class of plants. They quickly cover buildings, trellises, fences, pergolas, walls, stumps and bare banks of sand or clay. The laundry-yard and tennis-court may be screened by Vines on a wire trellis. Many of them are attractive for flowers, foliage and fruit. They may be used to vary the occasional monotony of long stretches of shrubbery, arranging themselves in picturesque, tumbling masses of brilliant foliage, flower or berry effects.

3 ft. high......

Euonymus radicans used as ground cover between evergreens.

40.00

Euonymus var. vegetus.—This was a bare wall which for lack of space could not be relieved by low masses of foliage. This evergreen vine required little or no space and makes a pretty effect the year round.

You have often seen beautiful compositions of nature, and wish to reproduce them. It is not always practical to dig up the large wild plants, and it would take many years to reproduce the same effect. With our native plants in varied sizes, you can reproduce some of the best bits of native landscape. With these cheap vines you can do it very quickly. They are not often offered so cheaply. It is best to buy 50 or 100. Put along a woodland border, plant among shrubbery or allow them to climb over a tennis back-stop, fence or climb up tree trunks.

For the Rose garden a protected situation is preferable. The soil should be prepared by digging it 1½ feet deep and adding an abundance of well-rotted manure and bone-meal. The plants may be put 2 to 3 feet apart. Budded plants should be placed so that the joint is three inches below the surface of the ground. Press the earth down firmly over the roots. Prune closely, cutting off from one-half to two-thirds of the tops. In Summer keep the soil hoed deeply. In Winter hill up the earth and add strawy manure 1 foot deep. In the Spring cut off the dead tips and thin out the branches.

ROSES

Hybrid Perpetual

\$1.00 each, \$7.50 for 10, \$60.00 per 100.

Alfred Colomb. Bright red; large; full; fragrant.
Anna de Diesbach. Carmine-pink; extra large.
Baroness Rothschild. Delicate rose-white.
Clio. Soft pink with rosy center.
Frau Karl Druschki. Pure white; very large.
Gen. Jacqueminot. Intense crimson; one of the best.
Gruss an Teplitz. Rich, velvety crimson.
Hugh Dickson. Brilliant crimson. Elegant foliage.
Louis Van Houtte. Fiery red; large full flower.
Marshall P. Wilder. Brilliant red.
Mme. Gabriel Luizet. Silvery pink.
Mrs. John Laing. Soft pink; very large.
Paul Neyron. Clear pink; the largest of all.
Ulrich Brunner. Cherry red, profuse; vigorous.

Austrian Brier Roses

Persian Yellow. Deep golden yellow. Harrison Yellow. Semi-double; golden yellow flowers.

Rugosa Roses, Rosa Rugosa

Red and white, Single	Each \$0.50	Per 10 \$4.50	Per 100 \$40.00
Conrad F. Meyer. Exquisite pink; double	1.00	7.50	60.00
Mme. Georges Bruant. Semi-double white	1.00	7.50	60.00
Blanc de Coubert. Pure white fragrant	1.00	7.50	60.00
Atropurpurea. Bright crimson	1.00	7.50	60.00

Climbing Roses.—How beautiful—how accommodating. Planted below a wall they grow up-planted above a wall the long vigorous shoots hang down most gracefully. The foliage is always healthy. The bubbling clusters of double pink, red or white flowers are so glowing there is really nothing in their period that deigns to compete.

Climbing Roses

\$1.00 each, \$7.50 for 10, \$60.00 per 100.

Alberic Barbier.
American Pillar.
Aviateur Bleriot.

Yellow in bud, fading to creamy white.
Single pink. Clusters.
Cream. Golden center. Crimson Rambler. Crimson; 50c. each, \$4.00 for 10. Dr. Van Fleet. Silvery pink. Pointed bud. Charming. Dorothy Perkins. Brilliant pink; 50c. each, \$4.00 for 10. Excelsa. Brilliant crimson, with scarlet edges. Gardenia. Creamy yellow; fragrant.
Hiawatha. Brilliant scarlet. Large clusters.
Ruby Queen. Deep red, white center.
Silver Moon. Single white, yellow stamen.
Tausendschon. Pink. Large clusters. Vigorous.
Wichuraiana. Pure white; single; fragrant.

Dwarf Polyantha Hybrid Roses

75c. each, \$6.00 for 10, \$50.00 per 100.

These varieties are of dwarf habit with smaller but very exquisite flowers. They make splendid edging plants and are particularly adapted to positions where low plants are needed. They require but little pruning.

Clothilde Soupert. Flowers pure white, tinted silvery rose near the center and a pearly white toward the edge of outer petals. A profuse bloomer.

Baby Rambler. Crimson, constant bloomer.

Hybrid Tea and Tea Roses

\$1.00 each, \$7.50 for 10, \$60.00 per 100.

Admiral Ward. Flowers of velvety crimson shaded with purple. A new introduction of vigorous growth. Very handsome.

Augustine Guinoisseau. This variety is especially valuable for cut flowers. The white flowers are very fragrant and

Chateau de Clos. Vougeot. A deep velvety crimson. This variety makes a strong growth and flowers freely.

Constance. (Hybrid Austrian Briar). A golden yellow rose of delightful fragrance. The buds are long and streaked with crimson. The foliage is of a shinning green. A recent introduction; this is one of the finest yellows.

Duchess of Wellington. A very intense saffron yellow rose. Healthy, strong growing habit. Glossy green foliage.

Frau Karl Smid. Satiny pink, with silvery sheen.

General MacArthur. A fine garden rose, deep rosy-crimson blossoms, very fragrant and free flowering.

Gen. Superior Arnold Janssen. A new rose of rich carmine color. A vigorous plant and very floriferous.

Geo. C. Wand. A lovely rose of orange vermillion. Few roses have a more beautiful coloring. A thrifty grower.

Gustav Grunerwald. A carmine pink rose with a yellow center and distinctly long-pointed buds. This is a fine healthy form.

Indiana. Deep crimson.

Jubilee. Clear; dark red; fine variety.

Jonkheer J. L. Mock. The finest of all pink Hybrids Teas. Described as Imperial pink, this is acknowledged as one of the best roses of recent introduction.

Joseph Hill. Large flowers of salmon pink, tinged with copper, very fragrant. A stocky plant flowering profusely.

Konigin Carola. Large flowers of pale satiny rose. A thrifty variety flowering freely.

Lady Alice Stanley. The flowers vary from light pink to a deep rose and are borne on long stiff stems. A very distinct rose.

Lady Ashtown. Deep pink blooms, large and full, very often on pendulous stems. Good variety.

Laurent Carle. A deep lustrous red. This a remarkably showy rose with its large flowers and brilliant color.

La France. Peachy pink; very strong.

Lieutenant Chaure. Velvety crimson flowers. An especially fine garden variety. Vigorous grower.

Lyon Rose. One of the showiest and most decorative varieties. Petal edges shrimp pink, center coral-red tinged with chrome-yellow at the base. The flowers are large and full.

Maman Cochet. Carmine rose with salmon yellow.

Miss Cynthia Forde. A fine rose of a deep showy rose pink.

Mme. Abel Chatenay. A beautiful flower of carmine rose, tinted salmon; the petals have a silvery tinge. A very robust variety worthy of a place in every garden.

Mme. Caroline Testout. Bright satiny rose. Free flowering. Sweetly perfumed.

Mme. Colette Martinet. Old gold, shaded orange yellow. The golden buds are unusually distinctive and are a marked contrast to the bronzed-green foliage.

Mme. Edouard Herriot. Known at the "Daily Mail Rose"; this rose is a prize winner. Coral red shaded with yellow and rosy scarlet; it presents one of the most charming of garden

Mme. Jules Bouche. A fine healthy variety. Salmon white shaded clear pink. A very meritorious variety for the garden. Mme. Jules Grolez. Light satiny rose. Free bloomer.

Satisfy your hunger for Roses at Hicks Nurseries. Come all Summer and take the plants home in bloom. This gives you an opportunity to study the delicate shadings and get just what you want.

Mme. Leon Paine. The combination of colors in this rose is remarkably beautiful. Silvery white with an orange yellow center and the reverse side of petals reddish pink. A variety of strong growth.

Mme. Segond Weber. The large rosy salmon blossoms of this rose are markedly distinctive. Growth is strong and erect.

Mrs. Aaron Ward. This rose is uniquely described as "Indian yellow, suffused with salmon." A wonderful variety, blooming freely and of vigorous habit.

Mrs. F. W. Vanderbilt. Flowers of a deep orange red shade. A very ornamental garden and bedding rose.

Mrs. Theodore Roosevelt. Another creamy-white rose but with a rose center. The buds are distinctly long-pointed. Good habit.

Ophelia. Although originated in 1912, this is still a most favored rose. A rosy pink shaded with salmon. Finely shaped blooms and vigorous habit.

Prince of Bulgaria. A very charming rose with flowers of silvery pink tinted with salmon. Blooms very large and well formed.

Radiance. A rose of many colors, brilliant carmine, shaded salmon and coppery red. Healthy habit.

Souv. de Gustav Prat. A pure sulphur white rose, sometimes without the yellow shading, very floriferous and perpetual blooming.

Souv. de Pierre Notting. Tea. A very handsome rose, apricot yellow tinted with orange. A fine healthy plant of strong growth.

Souv. de Pres. Carnot. Light rose and white.

Viscountess Folkestone. Light pink with a darket center. Large and fragrant flowers. An early bloomer and very free flowering.

W. R. Smith. Tea. Flowers of creamy-white flushed with bright rosy pink. Large and finely formed flowers.

Willowmere. (Rosa lutea hybrid). An Austrian rose hybrid. One of the most admired of new roses. Color a deep pink shaded yellow in the center and changing to carmine pink at the edges of petals. A very vigorous grower.

Wild Roses

50c each, \$4.50 for 10, \$40.00 per 100.

Rosa blanda. Meadow Rose. Pink.

Rosa multiflora. Blackberry Rose. White flowers.

Rosa nitida. Northeastern Rose. Pink; foliage shiny.

HARDY GARDEN FLOWERS

We have several acres of large vigorous plants, that will make a good showing the first year. We have also grown most of the varieties in pots. These can be planted all summer. Here is an opportunity for you to save time in either making a new garden or improving an old one.

FRUITS · SMALL FRUITS · NUTS

Apples

5- 7 ft. high, \$1.50 each, \$10.00 per 10, \$75.00 per 100. 6-10 ft. high, 3.00 each, 25.00 per 10. Dwarf, 3- 4 ft. high, 1.00 each, 7.50 per 10, 60.00 per 100.

SUMMER VARIETIES

Early Harvest. Yellow. Fine flavor. Aug. Red Astrachan. Red. Acid. July-Sept. Sweet Bough. Very sweet, Yellow. Yellow Transparent. Sub-acid. July-Sept.

FALL VARIETIES

Fall Pippin. Large yellow rich. Oct.
Fameuse. Red. Excellent dessert.
Gravenstein. One of the best. Sept.
*McIntosh. Delicious; juicy; red. Oct.-Nov.
Oldenburg (Duchess). Red; bears young. Aug.
Transcendent (Crab). Yellow; red cheek.
*Twenty Ounce. Very large. Good quality. Sept.

WINTER VARIETIES

*Baldwin. Large, red, fine. Winter.
Delicious. Large yellow, covered red.
*Hubbardston (Nonsuch). Red. Bears young. Oct.-Jan.
King. Large red. Oct.-Jan.
*Northern Spy. Red; juiey. Nov.-March.
Opalescent. Red; juiey; sub-acid. Nov.-Jan.
*R. I. Greening. Green; excellent. Nov.-March.
Roxbury (Russet). Medium. Good keeper. Jan.-June.
Smokehouse. Large; firm; juiey. Oct.-Feb.
Spitzenburg. One of the best. Nov.-March.
*Stark. Red; juicy; sub-acid. Oct.-Dec.
Stayman's Winesap. High quality. Red, juicy.
Wealthy. Red. Fine quality. Sept.-Dec.

*Can be supplied in 7-10 ft. size. They save two years. Dwarf trees can be supplied in the following varieties: Baldwin, Early Harvest, Gravenstein, McIntosh, Oldenburg, Red Astrachan, Yellow Transparent.

Cherries

 $5\text{--}7~\mathrm{ft.}$ high, $\$1.50~\mathrm{each},~\$10.00~\mathrm{per}~10,~\$75.00~\mathrm{per}~100$ $7\text{--}10~\mathrm{ft.}$ high, $~3.00~\mathrm{each},~25.00~\mathrm{per}~10,~200.00~\mathrm{per}~100$

*Bing. Large, black, sweet.
*Black Tartarian. Sweet. Favorite sweet variety.
Coe (Transparent). Amber, red cheek. Sweet.
*Downer's Late. Large, firm, juicy.
Early Richmond. Acid. Fine for pies.
English Morello. Late. Acid, dark red.
Gov. Wood. Yellow, sweet, productive.

Mercer. Very large. Sweet. End June. Montmorency. Sub-acid. Shining red. Napoleon. Sweet, yellow, red cheek. Rockport. Red, firm, sweet, excellent. Schmidt's. Flesh dark, tender, juicy. Windsor. Fine quality. Liver-colored. Yellow Spanish. High flavored. Juicy.

*Can be supplied in 7-10 ft. They save two years.

Pears

5-7 ft. high, \$1.50 each, \$10.00 per 10, \$75.00 per 100. 7-9 ft. high, 3.00 each, 25.00 per 10. Dwarf, 3-4 ft. high, 1.00 each, 7.50 per 10, 60.00 per 100.

Anjou. Green-russet, rich. Oct.-Nov.
*Bartlett. Everybody's favorite. Aug.-Sept.
Buerre Bosc. Best fall pear. Oct.-Dec.
*Clapp's Favorite. Yellow, red cheek. Aug.
Duchess. Large; yellow, buttery. Oct.
Keiffer. Yellow; coarse. Nov.-Jan.
Osband's Summer. Yellow; sweet. Aug.
Seckel. Sweet; juicy; favorite. Sept.
Sheldon. Russet, fine flavor. Sept.-Oct.
Winter Nelis. Russet; rich; sprightly. Dec.
*Comba grappiled in 7.0 ft. sing. Theorems of the

*Can be supplied in 7-9 ft size. They save two years. Dwarf Pears in the following varieties: Anjou, Bartlett, Clapp's Favorite, Osband's Summer, Seckel.

Fruit Trees are not for the Garden Alone

They make most beautiful lawn trees. Plums and sour Cherries are like huge drifts of snow when in bloom and make delightful trees for the children to play under. The beauty of Apple blossoms is unsurpassed. The blush of blooming Peaches immediately makes them eligible for the shrubbery border.

Peaches

5-6 ft. high, \$1.00 each, \$7.50 per 10.

Belle of Georgia. Large. White, delicious. Aug. Carman. White, blush cheek. July. Champion. White, rich, juicy. Aug.
Crawford's Early. Yellow. Old favorite. Sept.
Crawford's Late. Yellow, red check. Late. Sept.
Elberta. Yellow, juicy, productive. Aug. Globe. Very large, yellow. Sept. J. H. Hale. One of the best. Mt. Rose. Medium, white prolific. Aug. Old Mixon. Fine for canning. White. Sept. Stevens' Rareripe. Red Skin, white flesh. Oct. Stump. White. Highly flavored. Sept.

Plums

5- 7 ft. high, \$1.50 each, \$10.00 per 10, \$75.00 per 100. 8-10 ft. high, 5.00 each, 40.00.

*Abundance. Yellow red. Fine. Aug. Apple. Purple, finest flavor. Aug. Bradshaw. Red, juicy, good. Aug.

*Burbank. Yellow; rich; sugary. Aug. Green Gage. Sweet and rich. Aug.

Lombard. Dark red; productive. Aug. Oct. Purple. Good quality. Big crops-Wickson. Large; red; juicy. Sept.

*Can be supplied in 8-10 ft. size. They save three years.

Quince

3-5 ft. high, \$1.50 each, \$10.00 per 10.

Champion. Large; yellow; late. Orange. The best of all.

Currants

50c. each, \$4.50 for 10, \$40.00 per 100.

Black Naples. Musky. Good for jams. Cherry. Red, acid. Fine for jelly.
Fay's Prolific. Red; large; long bunch.
White Grape. Excellent, sweet, prolific.

Gooseberries

50c. each, \$4.50 for 10, \$40.00 per 100.

Downing. White; largest and best. Red Jacket. Red; large; sure cropper.

Grapes

50c. each, \$4.50 for 10, \$40.00 per 100.

Concord. Deservedly popular standby. Delaware. Red. Early. Best quality. Lutie. Red. New. Excellent. Moore's Early. Blue-black. Large, prolific. Niagara. Pale yellow, sweet; productive. Pocklington. Golden, juicy, sweet. Salem. Red, large berry, sweet. Worden. Large; black; sweet; early.

Blackberries

\$1.50 for 10, \$10.00 per 100.

Early Harvest. Good quality; prolific. Erie. Large; very early. Lucretia Dewberry. Trailing; large; juicy; sweet. Snyder. Medium size. Good flavor.

Raspberries

\$1.50 for 10, \$10.00 per 100.

Cuthbert. Large; black, early. Cuthbert. Large; red; delicious. Gol. Queen. Yellow; juicy; sweet.

Gregg. Black; sweet; rich; late. Marlboro. Bright scarlet; large; early. Miller's Red. Large; firm; bright red. Plum Farmer. Black; firm; immense crops. St. Regis. Everbearing. Red; large; sweet.

Strawberries

Runners for spring planting, 50c. for 10, \$2.00 per 100. Potted plants for summer planting, \$1.00 for 10, \$6.00 per 100.

*Bubach. Large; excellent flavor. Early Jersey Giant. Good flavor. Glen Mary. Tapering fruit. Sweet. Marshall. One of the best.
*Sample. Very productive.
Wm. Belt. Very large. Good flavor.

Progressive. Everbearing. Bestfall bearing. Superb. Everbearing. Try this with *Need other varieties planted with them to make them produce well.

Asparagus

50c. for 10, \$2.00 per 100.

Conover's Colossal. Large. Popular. Palmetto. Light green. Early.

Rhubarb

Strong Roots.

50c. each, \$4.50 for 10, \$40.00 per 100.

NUT TREES

Butternut, White Walnut. Juglanscinera

3 ft. high. \$0.75 each, \$6.00 per 10.

5 ft. high. \$2.00 each, \$15.00 per 10.

Hazelnut. Corylus americana.

1½ ft. high. 50c. each, \$4.00 per 10, \$35.00 per 100.

Hickory Mockernut. Hicoria alba. 3 ft. high. \$1.00 each, \$7.50 per 10. 4 ft. high. \$1.50 each, \$12.50 per 10, \$100.00 per 100.

Hickory Shagbark. Hicoria ovata. 2 ft. high. 75c. each, \$6.00 per 10. 3-4 ft. high. \$1.00 each, \$7.50 per 10. Pecan. Hicoria Pecan.

3-4 ft. high. \$1.50 each, \$10.00 per 10. 5-6 ft. high. \$3.00 each, \$30.00 per 10.

Walnut, English. Juglans regia. 3-4 ft. high. \$1.50 each, \$10.00 per 10. 4-5 ft. high. \$2.50 each, \$20.00 per 10.

Walnut, Black. Juglans nigra. 3-5 ft. high 75c. each, \$6.00 per 10.

Walnut, Japanese. Juglans Sieboldiana

cordiformis. 1 ft. high. 75c. each, \$6.00 per 10 \$50.00 per 100.
